Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/565,828	Applicant(s) TAKAGAKI ET AL.	
	Examiner CHRIS E. SIMMONS	Art Unit 1612	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 December 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on 12/03/2009 has been entered.

Applicants' arguments, filed 12/03/2009, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 103

Claims 15 and 31-35 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura et al. in view of Postma et al.

The examiner notes that, during an interview on 12/02/2009, applicant was informed that the proposed amendment and arguments appeared to overcome the standing rejections. A change in position by an examiner, while not routine, is certainly supported by precedent so long as the rules of Patent Office practice are duly complied with. See *In re Ruschig* 154 USPQ 118, 120-21

Art Unit: 1612

(CCPA 1967). Any delay and inconvenience caused by the change in position is regretted. However, upon further consideration, it appears the applicant's 7/30/2008 Declaration does not demonstrate unexpected results.

Applicant's arguments rely on the declaration's comparative results in the pulmonary emphysema model. The examiner does not find that the comparative results are based on a proper side-by-side comparison. The examiner notes that the data in Figure 3 at page 5 of the declaration shows more lowering of airway resistance (sRAW) and residual volume (RV) for TA-270 relative to the theophylline (Theo); however, the amount of TA-270 used in the experiment was *10 times more* than the amount of Theo used. Accordingly, it does not represent a proper side-by-side comparison for one to make the conclusion that the declaration shows a surprising or unexpected decrease in sRAW and RV as alleged by applicant.

Accordingly, whether one of ordinary skill in the field usually evaluates the therapeutic effect of test compounds by administering them concurrently or before the developing process of disease is not found to be persuasive since the amounts of the tested compounds differ by so much in the first place.

Applicant argues that even if TA-270 decreases eosinophilia in asthma, it does not mean the treatment of COPD - especially since COPD is mainly associated with an increase in neutrophils. This argument is not found to be persuasive. TA-270 does not decrease eosinophilia *only* as it is disclosed to decrease *total* inflammatory cell accumulation in the lung, this includes not only eosinophils but also macrophages and neutrophils.

Conclusion

No claims are allowed.
